Re: KGMG (FM), Oracle, Arizona

Facility Identification Number: 57504

Journal Broadcast Corporation Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed February 14, 2011, on behalf of Journal Broadcast Corporation ("JBC"). JBC requests further extension of the special temporary authority ("STA") granted on February 1, 2010, to operate Station KGMG with emergency antenna facilities pursuant to Section 73.1680.¹

In support of the request, JBC states that the licensed antenna supporting tower collapsed in an ice storm on January 22, 2010. JBC states that the tower owner completed construction of a replacement guyed tower but was subsequently required to replace it with a new self-supporting tower in order to comply with governmental regulations. JBC states that the change in supporting structure invalidated the modeling which had been done for its directional antenna, and required that the process be re-started. JBC states that, as a result, is has not yet received its replacement antenna.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

¹ KGMG is licensed for operation on Channel 292C2 (106.3 MHz) with effective radiated power of 0.44 kilowatt (H), 0.43 kilowatt (V), (Max-DA) and antenna height above average terrain of 1272 meters.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KGMG may continue to operate with an emergency Jampro, single-bay antenna mounted at the top of an existing 10-meter tower which is immediately adjacent to the tower which collapsed, with reduced effective radiated power not to exceed 0.098 kilowatt. JBC must notify the Commission when licensed operation is restored. JBC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on October 21, 2011.

Sincerely,

Charles N. Miller, Engineer
